Elevator Test: International Student Assist

For international students who are interested in studying in the US and university administrators interested in increasing their university's international student population, the International Student Assist app is a one-stop app that provides a roadmap to guide students through the process of applying and relocating to US universities, and assists administrators by streamlining the admissions process involved in welcoming international students to their university. Instead of shuffling from resource to resource and website to website, prospective students can use our app as a single portal to manage the journey toward studying in the US.
